

DWIKI YULIAN

Frontend Developer and Game
Enthusiast.

PROFILE

I am a web developer with experience in creating responsive and user-friendly websites using HTML, CSS and JavaScript. I have a strong passion for learning new technologies and frameworks, such as React, Typescript, Code Versioning and Docker. I am currently pursuing a degree in Computer Science at Binus University, where I have completed several projects related to web development, such as a portfolio website that showcases my skills and creativity. I am fascinated by the play-to-earn and blockchain industry, and I would love to join BreederDAO as a Frontend Developer Intern and work on creating functional and attractive digital assets for the metaverse.
